Making your office work for you...

Office Furniture • Office Refurbishment • Project Management • Design & Space Planning • Bespoke Joinery

Relocation • Storage • Installation

design... stylish interiors that are a pleasure to work in.

Our aim is to create an 'inspiring' workplace that will reflect your company's image and provide a pleasant working environment.

A well designed interior can improve productivity, help reduce staff turnover, reflect corporate values and optimise use of expensive office space...

partitioning... it's about using the environment you have to help your business achieve its objectives!

Partitioning can be something simple, or quite elaborate and stylish. Vision can help you create space by dividing work areas logically to provide space efficient workspaces. We cover all aspects of interiors from ceilings, flooring, lighting to data cabling and decorations.

furniture... Vision Inspired will recommend the right product for your application, reflecting different ways of working in today's modern office.

We offer a comprehensive portfolio of products from the world's leading manufacturers.
